

The Hands Free Splitter Advantages

More versatile for different log lengths

No need to wait for a return stroke

Less maneuvering of machine,
no time needed for alignment of log

Quick and easy: pick from the log pile,
turn and split at the split pile

Split several pieces without
repositioning machine

Work out front, much more visible,
especially at night under headlights

Less weight, small footprint,
compact design and easier storage

***Call for an appointment and
demonstrate one today!***

**It's so easy you could
split logs in a tux!**

Hands Free Log Splitter

The Hands Free Log Splitter can be produced to attach to most makes and models of skid steer. It is easily attached to the skid steer with the coupler levers and the quick attach mounting plates. Once attached to your skid steer you can split as many logs as you want in the comfort of your skid steer. No more backaches from splitting logs.

What can it handle?

The Hands Free Log Splitter can handle almost any log. It has the ability to split fresh cut or seasoned logs. It has been tested on Midwestern wood species including oak, elm, birch, etc.

Now offering the auger, PTO and cement mixer!

Ordering your Hands Free Log Splitter

When placing your order for your Hands Free Log Splitter, be sure you list the correct specification for your skid steer. Splitters can be molded for larger or small equipment.
